
(a) Earth's view: miss distance of each close approach (au)
(b) Asteroid's view: path-to-path distance (au)
absolute magnitude H (brighter = larger)
10
15
20
25
30
Classes overlap: a miss distance only bounds the path distance from above
PHA region:
distance ≤ 0.05 au and H ≤ 22
not hazardous
